When calculating the maximum borrowing, this will include any product fees you want to add to the loan. If the product fee is being added to the loan, this can exceed the maximum LTV. But it can't exceed the maximum loan amount.

For further advances individual loan elements will be stressed separately in line with the above. However, the stress rate applied to existing lending will also be set to a minimum of the stress rate applicable to the new borrowing. Please download our [further advance calculator](#) for support calculating potential further borrowing.

For portfolio landlord applications, an aggregate rental calculation applies (please refer to the lending criteria section of the TMW website for details)
